

Will be zoomable
When years ~~are~~ selected
Only the years selected
Will be seen.

Very easy to see shift
over years and would
Be a very cool interaction
sliding to make the
graph zoom which
adds to the amount ^{of data} and
quality of the visualization

Easy to See Average voter-
tendencies over the years
By state

This would be useful information
and an answer to a popular question
of how red/blue a state is. So
It makes the data relevant to
something people care
about!
